freeFree copies of Linnean Society Synopses of British Fauna

The Linnean Society recently decided to dispose of the remaining copies of their Old Series of the Synopses of the British Fauna, because they need the space for the New Series. They very kindly decided to GIVE the Old Series Synopses to any recipient who could use them, and would agree to take them away swiftly. The Horniman Museum has collected the Synopses on behalf of BCG, and David Allen, the Horniman's Librarian has agreed to act as a distributor for BCG members.

The following five titles are available in LARGE quantities:

- No. 6 Lumbricidae (Annelida), with Keys and descriptions.
By B.M. Gerard, 1964
- No. 8 Slugs (Mollusca) (Testacellidae, Arionidae, Limacidae)
By H.E. Quick, MB, BSc, FRCP, 1949.
- No. 9 British Woodlice, with a Key to the Species.
By E.B. Edney, 1954.
- No. 13 British Freshwater Bivalve Molluscs, with Keys and Notes for the Identification of the Species.
By A.E. Ellis, 1962.
- No. 14 British Barnacles. With Keys and Notes for the Identification of the Species.
By R. Bassindale. 1962.

We suggest that the easiest way to distribute these useful publications is to offer them in sets containing one of each title. Anyone wishing to receive a set (or sets, we have lots to distribute) should send the appropriate post and packing charge plus a self addressed label to the Horniman Museum at the address below. Cheques should be made payable to the Horniman Museum.

Bonus for early orders

We have a very few copies of the following titles, and propose to add these as a bonus to the first orders that we receive.

No. 2 Caprellidea (Amphipoda, Crustacea)
By R.J. Harrison BA, ALS, 1944.

No. 12 British Echiurids, Sipunculids and Priapulids
By A.C. Stephen 1960.
