SOURCES OF BIOLOGICAL RECORDS

"The Naturalist" (Part 3)

This part deals with biological records from outside the North of England published in "The Naturalist" from 1890 to 1899. A complete index of the records published in these three parts is stored on the University of Aberdeen's computer and copies can be obtained from Kenneth Watt. The references to natural history outside "The Naturalist's" sphere of interest have become fewer and we, therefore, propose to terminate this series here. Bill Ely will continue to extract any records and it may be possible to add them to the Aberdeen data base. If you wish to be kept informed of these additions please send Bill a foolscap s.a.e. but do not expect any reply for at least six months!

If anyone cares to sort the Irish, Scottish and/or Welsh records into their respective counties (which the observant amongst you will have noticed has not been done) then we should be delighted.

The following volumes are included in this index:-

Vol. XV	1890	Vol. XX	1895
Vol. XVI	1891	Vol. XXI	1896
Vol. XVII	1892	Vol. XXII	1897
Vol. XVIII	1893	Vol. XXIII	1898
Vol. XIX	1894	Vol. XXIV	1899

As in part 2, the records are presented in three indices -obituary, taxonomy and locality. In the taxonomic index the country names have been abbreviated - E (England), CI (Channel Islands), I (Ireland), S (Scotland) and W (Wales).
